

FR-1000

Face Recognition Technology Modernizing The Workplace

With Face Recognition Technology, FR-1000 time clock combines state of the art biometric technology with secure, reliable data management.

Facial recognition authentication is a better hygienic alternative to time clocks by maintaining a safer workplace. Plus, arrivals and departures are easily tracked by the employees simply showing their face in front of the FR-1000 device. In less than 1 second the employees' identity will be verified, followed by a photo ID and voice confirmation.

The FR1000 is a multi-functional timeclock that is modernizing the workplace with its innovative biometric technology. Using algorithm technology to recognize your employees, the software eliminates buddy punching and ensures accuracy of employee transactions.

Features

- Up to 5 years memory retention via standard lithium battery
- Data Management (clear logs, users, etc)
- USB Drive Data Management
- Set IP Address, Subnet Mask and Getaway
- Enroll, Delete, and Edit users
- Verification Methods: Facial Recognition, Fingerprint, Badge and PIN

Technical Specifications

Max Face Employee Capacity	200 Employees (per time clock)
Max Fingerprint Employee Capacity	1000 Employees (per time clock)
Max Card Capacity	10,000 Employees (per time clock)
Verification Time	Less than 1 second
LCD Display	LCD Touch Screen 2.8"
Communication	Built-in Ethernet & WiFi
Size/Dimension	167 x 147 x 34 mm(L x H x D)
Weight	1 lb
Installation Method	Wall Mounting
Operating Environment	32 to 113 Fahrenheit (0 to 45 Celsius)
Working Humidity	20% - 80%
