FR-2000

Face Recognition Technology Modernizing the Workplace

With Face Recognition Technology, biometric time clock (FR-2000) combines state of the art biometric technology with secure, reliable data management.

A complete time and attendance system, the FR-2000, instantly identifies employees and allows for a touchless hygiene alternative to fingerprint readers while still eliminating buddy punching.

Arrivals and departures are easily tracked by the employees simply showing their face in front of the FR-2000 device. In less than 1 second the employees' identity will be verified, followed by a photo ID and voice confirmation.

Benefits

- Safety increase with Face Recognition Technology
- Higher production with bell schedule access
- Door access control for security
- Eliminating buddy punching

AVAILABLE MODELS

FR-2000 + ID + WiFi

FR-2000 + ID + WIFI + Fingerprint

Features

- Up to 5 years memory retention via standard internal lithium battery
- Verification Methods: facial recognition, fingerprint sensor, badge & PIN
- 4.3" LCD touch screen
- Set Weigand Setting
- Communication Setting
- User Management
- Data Management (clear logs, users, etc)
- Upload and download data to USB drive

Technical Specifications

Maximum Employee Capacity	1500 Employees (per time clock)
LCD Display	Touch Screen 4.3" LCD
Weight	3lbs
Size/Dimensions	8" Wide, 7" High, 4" Wide
Communication	Built-in Ethernet and USB
Facial Recognition Speed Operating	≤1s
Humidity	20%-80%
External Interface	Built-n Bell System & Door Access Relay
Operating Environment	32 -113 Fahrenheit (0 - 45 Celsius)
Alarm Output	NO/NC
Installation Method	Wall Mounting
