

## AMG 100C

### Biometric Fingerprint Reader

Using an algorithm based on unique fingerprints, our Biometric Fingerprint Reader provides a secure and convenient way to punch in and out, while eliminating buddy punching and time theft. The modern design includes a LCD screen displaying the time and date, making transacting on the device simple for users.

The Biometric Fingerprint Reader uses the following verification modes: fingerprint, proximity badge/ID card, key chain FOB and PIN/password. Employees may enroll up to 10 fingerprints and the device is able to store up to 3,000 employees. Models are available with RFID or HID verification options. The Biometric Fingerprint Reader is the perfect solution for many industries, including small business offices, restaurants, and schools.

## Features

- Enroll up to 10 fingerprints per employee
- Each terminal holds 3,000 employees
- Plug and play simplicity
- Administrator and user distinction
- Multi language support
- Automatic data backup
- Verification mode: fingerprint, proximity badge/card, key chain fob, and pin/password

## Technical Specification

Fingerprint Capacity	3,000
User Capacity	1,000
Transaction Capacity	50,000
Fingerprint Placing Angle	±45°
Identification Time	Less then 1s
Identification Mode	1:N/1:1
Operation Mode	Stand-alone
Verification Mode	Fingerprint, PIN Code
Communication	RS232, RS485, TCP/IP, USB Drive
Power	5v
Name Display	Yes
Ring Inside	Yes
Voice Indicator	Yes
